

STATGRAPHICS Centurion XVI

Statistical Data Analysis and Visualization Software

STATGRAPHICS offers over 170 procedures for exploratory data analysis, descriptive and inferential statistics, statistical modeling, time series forecasting, SPC, DOE, and Six Sigma. Plus unique features such as the StatAdvisor, which interprets statistical results and StatPublish, which renders all output as HTML.

New in Version 16.1:

- 64-bit edition offers increased speed and data capacity.
- Statistical tolerance limits for normal, lognormal and Weibull distributions.
- Sample size determination for tolerance limits and capability indices.
- Multivariate visualization using parallel coordinate plots, Andrews plots, star glyphs and Chernoff faces.
- Recording of dynamic graphics in AVI movie files.
- Monte Carlo simulation.
- Generation of random samples from ARIMA models.
- Enhanced DOE Wizard.
- Direct input of SQL queries.
- Available in English, French, German, Italian and Spanish.

STATGRAPHICS can read data files created by most statistical packages. If you use another program, ask about competitive upgrade pricing. Academic and enterprise site licenses are also available.
